PRESSURE GAUGES

Product Details

The PG series stands for the wide range of pressure gauges provided by us. With MOC starting with all GI to all SS construction, it offers complete cost and chemical compatibility. The standard which is commonly available is Brass internals with SS 304 bodies. They are suited for all water and water treatment applications.

- The gauge provides a way to measure the intensity of various media in a pressure powdered machine.
- This is needed to make sure that there are no leaks or pressure changes, which might have a negative effect on the system's performance.
- Here, the said media can be fluid, steam, water, and gas.
- The pressure gauges have a unique design that allows their operation within a specific range of pressure.
